0. **Your thoughts?** How are you feeling this week?

1. Yes, No, but Sometimes Maybe?

Fill in the environment diagram that results from executing the code below until the entire program is finished, an error occurs, or all frames are filled. *You may not need to use all of the spaces or frames.*

A complete answer will:

- Add all missing names and parent annotations to all local frames.
- Add all missing values created or referenced during execution.
- Show the return value for each local frame.

You must list all bindings in the order they first appear in the frame.

<pre>def yes(no): yes = 'no' return no no = 'no' def no(no): return no + yes(no) yes = yes(yes)(no)('ok')</pre>	<div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;"> Global frame <div style="display: flex; justify-content: space-between; margin-top: 10px;"> <div>yes</div> <div>_____</div> </div> <div style="display: flex; justify-content: space-between; margin-top: 10px;"> <div>no</div> <div>_____</div> </div> </div>	func yes(no) [parent=Global]
